Air Quality Forecast for the UK

Issued by the Met Office

Today: Very isolated pockets of Moderate air pollution possible across southeast England on Thursday, due to the fine weather and light winds. Elsewhere, outbreaks of rain or showers will help to keep air pollution levels Low.

Tomorrow: Low levels of air pollution are forecast across the UK on Friday.

Outlook: Low air pollution levels are expected throughout the period for much of the UK. However the odd pocket of Moderate is possible anywhere, as fine, sunny weather becomes increasingly dominant.
